This application is in condition for allowance except for the following formal matters:

***Oath/Declaration***

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration has reviewed and understands the contents of the specification, including the claims, as amended by any amendment specifically referred to in the oath or declaration.

***Specification***

The abstract of the disclosure is objected to because: The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details. The language should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Correction is required. See MPEP § 608.01(b).

***Allowable Subject Matter***

Claims 1-27 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose, teach or suggest, taking claim 1 as exemplary, a method of determining a forced gating function for at least one of a plurality of clocked state-

Art Unit: 2825

holding elements, wherein said forced gating function compares the input and output of said at least one element, the method comprising simulating the performance of the element for different implementation conditions, measuring the performance of the element for each condition, and determining the implementation of the forced gating function in dependence on said measured performance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dean et al. [U.S. Patent #6,434,704 B1] disclose improving the efficiency of clock gating. Borkovic et al. [U.S. Patent #6,643,829 B1] disclose determining a gating circuit. Hathaway [U.S. Patent #6,536,024 B1] discloses designing clock gating circuitry. Lang et al. disclose "Individual Flip-Flops with Gated Clocks for Low Power Datapaths."

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
